Turning Job Market Noise into a Clear Action
Plan

Siva & Ethan | Career Intelligence Hub

Technical Depth Meets Operating Perspective

Siva

Year 2 Computer Engineering

Combines technical depth with consulting experience. Expert in identifying customer pain points, execution, and go-to-market strategy.

Ethan

Year 2 Computer Engineering

Self-driven builder and technical architect. Multiple hackathon placements with a focus on scalable production-ready deployment.

Self-Driven Entrepreneurs | Year 2 CE Students

The Modern Job Market is a Time-Consuming Information Black Hole

Time Constraints

Students and professionals lack the hours needed to navigate fragmented job boards and compare requirements manually.

Information Overload

Constant jumping between platforms leads to analysis paralysis and wasted effort on non-valuable activities.

The Feedback Gap

Applicants fall into a "black hole" with no signal on why they were rejected or what skills they need to improve.

Convergify Streamlines the Career Journey

01

Discover

Centralise fragmented job listings into a single, searchable portal.

02

Diagnose

LLM-powered skill extraction and semantic gap analysis.

03

Upskill

Personalised learning timelines with content-agnostic recommendations.

04

Apply

Active diagnostic engine to solve the "Taxonomy of Rejection."

One Workflow. Total Career Intelligence.

Centralised Discovery Meets Latent Competency Extraction

Unified Portal

Aggregate fragmented job listings from major platforms into one searchable, high-efficiency interface.

Beyond Keywords

Detects nuanced competencies like project management and communication often missed by standard tools.

Hidden Skill Detection

LLM-powered extraction identifies transferable skills in non-traditional records and experiences.

Real-Time Demand

Prioritises skill clusters based on actual, current job market requirements and semantic analysis.

Semantic Gap Analysis Powers Personalised Learning

Precision Mapping

Direct comparison between user resumes and real-time job requirements using semantic analysis.

Strategic Upskilling

Generates a timeline that prioritises the most valuable skills for immediate market impact.

Content Agnostic

Recommends the best resources across YouTube, Coursera, SkillsFuture, and MOOCs.

Budget & Level Aware

Tailors recommendations based on the user's specific financial and skill constraints.

Solving the "Taxonomy of Rejection"

Predictive Pattern Analysis

Identifies why applications stall before they fail, moving beyond simple spreadsheet tracking.

Root Cause Identification

Pinpoints specific gaps: ATS mismatch, technical skill deficiencies, or cultural alignment issues.

Actionable Feedback Loop

Provides clear, measurable next steps to fix application weaknesses and improve success rates.

UNDERSTANDING INDIVIDUAL LEARNING PATHS

A Learning Path is a sequence of acquiring knowledge and skills necessary to achieve a desired qualification level or long-term personal goals

A LEARNING PATH EXAMPLE

An individual learning path is a personalized trajectory for achieving long-term personal goals through a well-defined strategy to achieve long-term personal goals

Mapping the Path to Success

Convergify Offers Proactive Guidance Where Others Only Provide Content

Dimension	LinkedIn Learning / Jobscan	Convergify
Content Source	Single library (LinkedIn) or job-specific optimization.	Content-agnostic: YouTube, Coursera, SkillsFuture, MOOCs.
Timing	Reactive: Optimizes for a post you already found.	Proactive: Guides months of targeted upskilling in advance.
Core Objective	Better formatting and keyword matching.	Genuine qualification through real-time demand analysis.

Moving earlier in the funnel to build real value.

Proven Prototype & Scalable Tech Stack

273+

Roles Covered via Gemini-Powered Skill Heatmaps

Multi-source Job Aggregation Engine

LLM-based Resume Parsing & Gap Analysis

Dynamic Career Roadmap UI

Production-Ready Deployment Architecture

Core Infrastructure

Next.js & React (Frontend)

Supabase (Backend & Auth)

Google Gemini (AI Engine)

Designed for institutional scale and seamless university data integrations.

Sustainable Growth & Monetisation Strategy

Freemium Adoption

Drive user acquisition with free access to general heatmaps and one personalised career roadmap.

B2B Partnerships

Scale via institutional partnerships with universities for bulk access and student success tracking.

Discovery Credits

Monetise through deeper analytics, premium guides, and specialised career intelligence tools.

Outcome-Driven

Focus on reducing time-to-skill and improving application success to prove long-term value.

Strategic Investment to Scale Data, Product, and Partnerships

Data Scaling & Integration

Secure and scale reliable data integrations across major job platforms with high-frequency refresh cycles.

Product Excellence

Refine the diagnostic engine and roadmap generation into a polished, measurable, and high-conversion user experience.

Institutional Pilots

Run pilot programs with universities to prove outcomes—reducing time-to-skill and improving application success.

Convergify

Saving Time and Turning Confusion into Clear
Career Pathways.
