

EDUCATION

Nanyang Technological University, Singapore Aug 2024 - May 2028
Bachelor of Engineering in Computer Engineering, CGPA: 4.26

- Honours Second Class (Upper)
- Software Engineering, Python, C, C++, Java, Discrete Mathematics, Statistics

St Andrews Junior College, Singapore Jan 2020 - Dec 2021
A-Level Certification

- Physics, Chemistry, Mathematics, Economics, General Paper

EXPERIENCE

MINDEF | BMTC | 9 DIV Mar 2022 - Jan 2024
3rd Sergeant, Training Coordination Supervisor

- Awarded three Commander's Coins and a Letter of Appreciation from multiple Commanding Officers (41 SAR, BMTC Sch 2, BMTC HQ) for exceptional performance in logistics planning and operational execution.
- Orchestrated complex training schedules and resource allocation for military schools, ensuring zero downtime despite dynamic operational constraints and adverse weather conditions.
- Recognised for cross-unit versatility, coordinating high-stakes training requirements between Mono-intake Armour Units and Basic Military Training Centres.

ACADEMIC PROJECTS

Reimagine Learning Analytics | Hackerthon | 2nd Runner-Up Aug 2025 - Oct 2025
Full-Stack Developer, Project Architect, Team Coordinator

- Constructed a full-stack learning analytics dashboard using React (Vite) and FastAPI/Python to address student undervaluation of the NALA AI Assistant by promoting deeper learning and goal setting.
- Engineered 4 advanced analytical visualisations (e.g., Bloom's Taxonomy) to address a 75% student disengagement rate, integrating Google Calendar API for automated goal tracking and utilising Supabase for secure data persistence.

NTU X SimplifyNext Agentic AI | Hackerthon | Semi-Finalist Aug 2025 - Sep 2025
Full-Stack Developer, Agentic Architect, Process Developer

- Engineered a full-stack career guidance platform featuring a React frontend and a modular Flask API backend utilised strands-agents for core chat intelligence and role data management.
- Developed a flexible, configurable system with SQLAlchemy data persistence, auto-config loading, and specialised agent tools (YouTube/scraping), while designing key endpoints for dynamic role details and optional PDF generation.

iNTUition v11.0 | Hackerthon | 1st Runner-Up Mar 2025 - Mar 2025
Full-Stack Developer, Project Architect, Presenter

- Engineered a full-stack AI assistant combining 5+ major management frameworks (ADKAR, Kotter, etc): With FastAPI backend and Groq-powered LLM core to synthesise real-time insights, served via a responsive HTML/CSS/JS interface.
- Streamlined deployment and data integration: Implemented a Docker-ready pipeline, integrated NewsAPI to fetch live industry trends, and established a feedback logging system to aggregate user sentiment data for future model training.

SKILLS SUMMARY

- GAI & LLM Integration
- Full-Stack Development (Python/React)
- API Development (FastAPI & Flask)
- Prompt Engineering
- Database Management (ORM & SQL)
- Third-Party Integration
- Web Scraping & Automation
- RAG (Retrieval-Augmented Generation)
- Cross-Functional Leadership
- Strategic Operations Planning
- Crisis Management & Adaptability
- Technical Communication & Presentation

AWARDS

- 3rd Place - Reimagine Learning Analytics joint collaboration between NTU ATLAS and Imperial College of London CHER
- Semi-Finalist - NTU CAO x SimplifyNext Agentic AI Hackathon
- 2nd Place - NTU IEEE Hackathon 2025 hosted by MSD and NTU IEEE
