

PL SIVANADARAJAN

| PLSI0001@e.ntu.edu.sg | 9231 2946 | linkedin.com/in/pl-sivanadarajan-728295358 |

Education

Nanyang Technological University Computer Engineering	2024-Present
St Andrew's Junior College	2020-2021
Anglo-Chinese School (Independent)	2017-2019

Technical Skills

Languages & Tools: Python (Pandas, NumPy, Matplotlib, TA-Lib, yFinance), SQL, Excel, APIs

Additional: Basic knowledge of C, C++, Java

Data Analysis: Backtesting frameworks, Time Series Analysis, Data Visualisation in Python

Honours & Awards

Reimagine Learning Analytics @ NTU Hackathon – 2 nd Runners-up	Oct 2025
NTU X SimplifyNext Agentic AI Hackathon 2025 – Semi Finalist	Sep 2025
NTU iNTUition v11.0 Hackathon 2025 – 1 st Runners-up	Mar 2025

Experience

Singapore Learning Academy (SLA) Student Management Consultant	Cambodia Dec 2025 – Dec 2025
• Led end-to-end market and course portfolio analysis in a low-data environment by extracting and structuring ~150 SDF-listed courses into a usable dataset, validating outputs for accuracy and consistency • Developed and tested strategic hypotheses on market supply–demand gaps, course performance, pricing, language effects, and scalability through structured, multi-step analysis workflows • Synthesized quantitative findings with business intuition to produce course-level, actionable recommendations, presenting insights and an implementation roadmap directly to SLA's leadership board	
URECA Research Program FX Carry Trade Researcher	Singapore Aug 2025 – Current
• Designed a modular research pipeline for FX carry trades, defining excess return computation, forward–spot alignment, and parameterised backtesting across holding periods (1M, 3M, 6M, 12M) • Implemented and evaluated baseline carry strategies on USD/JPY using spot and forward rate data from 2020 onwards, producing cumulative excess return curves and yearly performance summaries • Currently testing regime-based risk filters (VIX levels, rolling VIX percentiles, MSCI trend indicators, FX volatility) to assess sensitivity of carry returns to global risk conditions	

Projects

AI-Powered Career Development Platform - NTU X SimplifyNext Agentic AI Hackathon 2025

- **Designed and owned the end-to-end architecture** of an AI-powered career guidance platform, defining the multi-step analysis workflow and system orchestration
- **Implemented the platform using LLM-assisted development**, integrating AI services (AWS Bedrock, Gemini), external data sources, and REST APIs into a unified pipeline
- **Built a full-stack prototype (Flask + React)** that delivers structured career insights and professional PDF reports through an interactive user experience

Change Management AI Agent - NTU iNTUition v11.0 Hackathon 2025

- **Researched and structured** industry-standard change management frameworks (ADKAR, Lewin, Kotter, McKinsey 7S, Nudge Theory) to ground AI responses in recognized methodology
- **Designed and iterated prompt engineering guardrails** to enforce domain boundaries, ensuring the assistant referenced frameworks and avoided out-of-scope responses
- Collaborated with the team to test, refine, and evaluate AI behaviour, improving response relevance, tone, and alignment through iterative feedback

Algorithmic & Micro-Market Trading Strategy Development – Personal Project

- **Built an automated Python back testing framework** that supports **any number of tickers**, enabling scalable evaluation of technical strategies across assets
- **Implemented a full parameter sweep engine** to systematically test hundreds of EMA/SMA crossover combinations, aggregating performance metrics across tickers to identify robust configurations
- **Developed realistic trade simulation logic** with next-day execution, capital compounding, drawdown tracking, and automated export of ranked strategy results for analysis

Leadership & Activities

NTU NFC Quant Finance Academy In-Training

Singapore
Aug 2025 – Nov 2025

- Learning about the basics of Quantitative finance – CAPM, Monte Carlo, Markowitz Portfolio Optimisation, ARIMA Time Series

NTU Hall 8 Floorball Vice-Captain

Singapore
Aug 2024- May 2025

- Led team strategy and match-day logistics for Inter-Hall Games 2025.
- Planned and facilitated weekly training sessions; mentored new players to improve technical skills.

Languages & Interests

Languages: Fluent in English and Tamil (spoken and written)

Interests: Floorball, Badminton, Cultural Violin
